

Case Selection & Preoperative Planning

The foundation of a successful surgery starts with thoughtful selection and complete preparation.

✓ Case Suitability Consults

- I'm available for imaging reviews, diagnostics, and collaborative decision-making.

✓ Preoperative Protocols Shared in Advance

- Fasting, medications, and preparation instructions are customized and clinic-aligned.

✓ Support for Informed Consent

- I provide guidance to help you navigate complex client conversations, when needed.

✓ Imaging & Lab Requirements Clarified

- Recommendations for radiographs, bloodwork, or advanced imaging are shared early.

✓ Scheduling Coordination

- Whether booked directly with me or through your practice's point of contact, we will work together on what works best for your clinic.

✓ Referral Support if Needed

- If a case is not ideal for in-house surgery, I'll offer alternative guidance at your clinic.

Cooperative early planning creates smoother days and stronger outcomes. My job is to make it as **stress-free** for you as possible.

A handwritten signature in black ink, appearing to read "Dr. Michael Miller", written over a horizontal line.
